

NextGen TIME

Are you ready to transform your STEM program for the Next Generation Science Standards?

If so, it's time for NextGen TIME!

Toolkit for Instructional Materials Evaluation

The Einstein Project is partnering with the Wisconsin Society of Science Teachers to find districts that are ready to move the needle when it comes to professional learning on NGSS and the successful selection and implementation of new instructional resources.

NextGen TIME will...

- allow your district's educators to make evidence-based decisions in selecting high quality instructional materials.
- provide your educators with a transformative professional learning experience that will help them to successfully implement those instructional materials designed for next generation science.

*Did we mention it's **FREE**?*

Join us in the summer of 2019 in...

Port Washington • Green Bay • Central Wisconsin
June 19-21 TBD TBD
